## We Offer a Choice of Two Rental Options

### 1: Standard Rental

Standard battery powered machines are available for a minimum of 6 months rental. Rental agreements will be offered on a monthly basis (minimum) once the initial 6 month period is completed.

### 2: Rent, Try, Buy

Machines can be rented for a minimum period of 12 months.

If at any time during any 12 months rental period you decide to purchase the machine, we will refund 75% of your rental payments towards the total cost of the machine. That is, 75% of the rent you have paid within the present 12 month rental period will be refunded.

Each rental period is for 12 months. The first rental period begins the day you receive the machine and is valid for 12 months. You may choose to buy the machine at any time within any 12 month rental period.

At the end of each 12 month period you will be offered the option of buying the machine or renewing the existing rental agreement, or, entering into a standard rental agreement (minimum month by month agreement without the rent, try, buy option).

Rental machines are available from \$100 per week.

Charges quoted do not include cost of delivery and pick-up.

Please contact us for pricing details or to discuss any specific requirements you may have.
