

# Mega Dumper Custom-Built Heavy-Duty Vertical-Lift Bin-Tippers

Ideal for Bakeries, Fruit Processors, Meat Processors, Grape Growers or Wineries etc.

**Custom-Built to Suit Specific Requirements**  
Lift height - Weight Capacity - Power Supply - Frame - Mobility

## Empty up to 750kg weight

Hydraulic pressure-relief valve prevents overloading. Flow-control valve accurately regulates lowering speed at all times.

## Tipping Height

Custom-built to required height up to 6 metres.

## Maintenance-Free

Mega-Dumpers do not require regular maintenance and have a history of proven reliability.

## Safety Guarding Panels

Guarded to at least 2.5 metres high on both sides.

## Unique tipping action

Bins raised vertically, then gently rotated around the lip of your hopper. Action can be stopped to allow gradual emptying of product.

## Galvanised or Stainless Steel Options

Standard machines have fully hot-dip galvanised steel frames. Stainless steel option available for entire machine or some parts eg. bin-cradle or sheetmetal covers.

## Electrically

### Interlocked Doors

The machine **WILL NOT OPERATE** unless the door is closed.

## Mobility

Four heavy-duty castors or lugs for bolting to floor. Castors include 2 lock-down feet to ensure stability during emptying process.

Model Shown:  
600kg bin capacity,  
5.3 metre tipping height,  
bin dimensions 1050L x 1220W x 850W

## Range of Power Options Available

- 3-phase
- single phase
- gel cell battery

## Simple Operation

Wheel bin/hopper in, press 'Up' to lift and empty. Press 'Down' to return cradle to ground level. Machine can be stopped at any time during operation by removing finger from the button. Machine will cease operation **IMMEDIATELY** if door is opened during operation.
