We Offer a Choice of Two Rental Options

1: Standard Rental

Standard battery powered machines are available for an initial period of a minimum of 6 months hire. Once the initial 6 months is completed a further 6 month (or longer) rental agreement will be available at the existing rate.

Should a further 6 month agreement not be required, rental on a monthly basis (minimum) will be available at current rental rates.

At times we do have machines available for initial rental periods of less than 6 months. Should you require a machine for less than 6 months, please contact us by telephone or email to discuss options.

2: Rent, Try, Buy

For new machines initially hired for a minimum period of 12 months.

If at any time during the first 12 months rental period you decide to purchase the machine, we will credit 75% of your rental payments towards the purchase price of the machine.

That is, 75% of the rent you have paid within the first 12 month rental period will be credited towards the purchase price if you decide to purchase the machine outright during or at the conclusion of the first 12 month rental period.

This offer is a one-off offer and does not carry over should the rental period be extended beyond the initial 12 month period.

At any time after the initial 12 month rental period is completed (and the rent, try buy option was not taken), the machine will be still be available for purchase at full current market value for a second-hand machine (that is, no credit for rental payments made).

Please contact us for pricing details or to discuss any specific requirements you may have.
